

Equation Work Template

March 23, 2026

How to Use This File

Replace the sample equations below with your own work.

- Use `equation` for one numbered equation.
- Use `align` to show multiple steps with numbers.
- Use `align*` if you want steps without numbers.
- Add `\label{...}` and refer to equations with `\eqref{...}`.

1 Equation List

1.1 Single Equation

This is a single numbered equation:

$$E = mc^2 \tag{1}$$

You can refer back to Equation (1).

1.2 Show Your Work

Use this format when you want to show each algebra step:

$$2x + 3 = 11 \tag{2}$$

$$2x = 8 \tag{3}$$

$$x = 4 \tag{4}$$

Equation (4) gives the final answer.

1.3 System of Equations

$$y = 2x + 1 \tag{5}$$

$$y = x + 5 \tag{6}$$

1.4 Unnumbered Scratch Work

Use `align*` if you do not want equation numbers:

$$\begin{aligned}(x+1)^2 &= x^2 + 2x + 1 \\ &= x(x+2) + 1\end{aligned}$$

2 Your Work

Copy one of the blocks above and replace it with your own equations.

$$f(x) = x^2 + 3x + 2 \tag{7}$$

$$f'(x) = 2x + 3 \tag{8}$$
